

Company Profile

WHO WE ARE

Aldridge, is a subsidiary company of Traffic Technologies Ltd. It is an Australian owned and operated company and is at the forefront of the Intelligent Transportation Systems industry.

In today's traffic environment, static road signs are no longer enough to provide motorists with all the information they require in a relevant and timely manner. This is where Aldridge's road management solutions can, in consultation with all stakeholders tailor a solution for you.

At Aldridge we pride ourselves on delivering road management solutions and intelligent traffic systems that provide relevant and timely information or messages to motorists to inform them of the traffic environment ahead of them so that they can make informed decisions ahead of time. Better informed motorists help create safer and smoother traffic flows on our road network.

Our Service

DESIGN & BUILD

Aldridge can help you find the best and most cost-effective solution to your traffic management issues. We have extensive experience, technology and resources at our disposal that will enable us design, build and even install the right solution for you.

PROJECT MANAGEMENT

Aldridge can take full control for you and manage projects from start to finish to ensure they are completed on time, within budget and to ensure that the solutions you have purchased is installed correctly and is in the best possible condition and configuration for the task it was designed to do.

SERVICE & MAINTENANCE

To get the best value and life out of your traffic management solution it always a wise idea to keep your products regularly maintained to ensure the solution keeps working and more importantly works when it needs to work. Regular maintenance checks and minor tasks carried out can make all the difference to the product functionality and to the return on your investment.
