

Work Zone Management Camera System

Frequently Asked Questions

1: What is the WZMC System used for?

- A: - Protection against future litigation.
- Ensures accurate daily/weekly/monthly counts of deployed equipment
- Documentation of completed work activities
- Management tool to review and improve quality control
- Asset management tool to document quality and condition of a variety of assets

2: Where are the videos stored?

A: The videos are stored in the **Ver-Mac Cloud** and can be easily accessed from your pc.

3: Is the video storage software secure?

A: Yes. You choose your own unique username and password which can be changed at any time.

4: How long are the videos kept on file for?

A: All videos are stored within the cloud based system for a maximum period of three years. However, you do have the option of downloading and storing files onto your own server if required for longer than three years.

5: How do I locate a particular video?

A: You can search for individual videos by a specific date/time, ID/name or via location using the map.

6: How is the camera powered?

A: The camera is wired directly to the vehicle battery and installs in less than 15 minutes. There is also an optional extra for vehicle cigarette plug option.

7: How does the camera know when to activate and deactivate?

A: The camera contains a proximity sensor with voice feedback making start/stop recording effortless.

8: Is the camera secure?

A: Yes. A rugged case with locked cable prevents the camera from being disconnected.

10: Can the battery run out of charge?

A: No. Battery protection circuitry allows the camera battery to be fully charged for video transfer.

11: When do the videos upload to the cloud?

A: Videos automatically upload when the dashcam comes into Wifi range of the base station.

12: How many cameras can be connected to one base station/server?

A: As many as required. Additional base stations/servers are required for other locations.

13: Are there any additional communication fees?

A: No smartphone or cellular communication fees incurred.

Frequently Asked Questions continued

14: Why is the WZMC system better than a regular dashcam system?

A: Everything is automated. There is no need to retrieve, organise or send videos.

15: Can the camera record videos at night?

A: Yes. The intuitive dashcam records high quality footage day and night.

16: What is the capacity of video storage?

A: 750 minutes per month of video storage (9,000 minutes per year)

17: How long is the video license period once purchased?

A: 12 months.
