SP-3248V SPEEDCAM

SP-3248V SPEEDCAM - Portable Speed/Automatic License Plate Number Recognition (ALPNR) Camera System

The SP-3248V SpeedCam system is designed to automatically capture a picture of a speeding vehicle, along with the speed and license plate number. Combined with the speed awareness trailer and SpeedLog software, the SpeedCam is a cost effective alternative to other automated license plate recognition systems. The SP-3248V SpeedCam is the ideal speed enforcement tool for mining, oil, utility and many other private applications that have recurring speeding problems.

FEATURES & BENEFITS

- High-End Traffic Calming Device Get all the benefits of our standard speed feedback signs, plus the camera and software to capture and manage recurring speeding vehicles.
- **Speedlog Software** Simple to use web interface that allows you to capture pictures, license plates and speeds
- Point and go Setup With automatic discovery and native in-browser streaming, setting up a traffic enforcement camera has never been simpler. Simply point at the road and use the visual cues from your smart device to confirm correct aiming.
- Two Lane Coverage When mounted at the side of a roadway, a single trailer can record vehicles from two adjacent lanes, and can track vehicles at speeds ranging between 10 160km/h in both directions.
- Self Contained SP-3248V SpeedCam units include two camera sensors, an infrared illuminator and a dual-core processor. The exclusive on-board algorithms track vehicle license plates to accurately compute vehicle speeds and to count traffic flow.

Traffic Systems

SP-3248V SPEEDCAM

SPEEDLOG SOFTWARE

- · Automatically logs vehicles that exceeded the speed limit
- · View the unit, date/time, logged speed, speed limit, plate number, plate picture and status at a glance
- · Review infrared or colour picture for the plates and vehicles
- · Ability to manually modify the plate number, status etc.
- · Auto GPS location of each deployed unit
- · Generate reports (e.g. over speed vehicles per hour per day)

DISPLAY

- Speed display panel: 810mm x 889mm
- Full matrix display: 32 x 48 pixels
- High definition display cards
- 1 LED per pixel
- · Automatic brightness adjustment

DIMENSIONS AND WEIGHT

- Overall length: 3200mm
- Overall width: 1600mm Travelling height: 2480mm
- 3380mm
- Operating height: • Weight (approx.): 580kg

OPTIONS (Other options available)

- · Battery charger
- Data logger
- Modem with GPS
- Data plan (requires modem)
